MODERN BI & ANALYTICS SOLUTIONS FOR VIEWPOINT

Modern BI & Analytics for Viewpoint QuickLaunch for Microsoft Power BI

- ✓ Gain visibility into Viewpoint Vista and other enterprise data
- ✓ Implement BI framework that enables your company to become data-driven
- ✓ Reduce development costs
- ✓ Create flexible reports, visualizations, and dashboards in minutes

Become a data-driven construction company with Preferred Strategies' QuickLaunch™ for Viewpoint. Connect your Vista data via QuickLaunch to Microsoft® Power BI and enable self-service analytics in the office or at the job site. Combine your Vista data with third-party data such as CRM or field data to derive even more powerful insights. QuickLaunch supports your Vista User Defined fields to ensure the accuracy of your reports and analysis. Find out how QuickLaunch for Vista with Power BI will transform the way your company delivers analytics to end users and change the way you look at your next project.
